

ENVIROPLUS

Startup Funding & Government Registration Workflow Pack

Maharashtra • CleanTech • IoT • AI • Environmental Intelligence

Testing-use notice: This package is prepared for demonstrating a startup-funding platform. Company identity fields, registration identifiers, people and certificates are fictional test data. Government identifiers are intentionally represented as non-verifiable test values. Do not submit them as genuine records.

1. Executive Company Profile

Field	EnviroPlus information
Legal entity	EnviroPlus Technologies Private Limited
Brand	EnviroPlus
Sector	CleanTech / Environmental Technology
Primary domains	Air • Water • Wastewater • Emissions • Noise
Business model	B2G / B2B environmental monitoring and intelligence
Stage	MVP / Pilot
Proposed base	Navi Mumbai, Maharashtra
Funding requirement	■60,00,000
Use of capital	Product engineering, sensing infrastructure, AI, cloud, validation and pilot deployment
Target users	Pollution-control authorities, industrial units, environmental teams, infrastructure operators
Core proposition	Turn environmental data into actionable monitoring, alerts, analytics and compliance-support workflows

Executive summary: EnviroPlus proposes a unified environmental intelligence layer that connects authorized IoT/industrial data sources to cloud infrastructure, analytics and role-based dashboards. The platform is intended to help government and industrial stakeholders observe environmental conditions, detect anomalies, prioritize interventions and generate structured reports.

2. Registration & Identity Data for Website Testing

Application field	Test entry	Validation state
Entity name	EnviroPlus Technologies Private Limited	Complete
Brand name	EnviroPlus	Complete
Entity type	Private Limited Company	Complete
Incorporation year	2026	Complete
State	Maharashtra	Complete
District	Thane	Complete
City	Navi Mumbai	Complete
PIN	400705	Complete
Website	demo.enviroplus.in	Complete
Email	demo@enviroplus.in	Complete

Application field	Test entry	Validation state
Mobile	+91 90000 00000	Complete
Entity PAN	TEST-ENV-PAN-001	Test value
CIN	TEST-ENV-CIN-2026-001	Test value
DPIIT number	TEST-DPIIT-ENV-001	Test value
GSTIN	TEST-GST-27-ENV-001	Test value
Udyam number	TEST-UDYAM-ENV-001	Test value
MSInS profile ID	TEST-MSINS-ENV-001	Test value

For a production deployment, the platform should distinguish **format validation**, **cross-document consistency** and **official verification**. A typed identifier must not be treated as government-verified merely because it matches a pattern.

3. Founder & Team Information

Name	Role	Background	Contact
Aarav Mehta	Founder & CEO	B.Tech CSE; product strategy, AI/software and business development	ass.developer@enviropius.in
Riya Sharma	Co-Founder & CTO	B.Tech Electronics & Computer Engineering; IoT, cloud, AI/ML	riya.dem@enviropius.in
Karan Deshmukh	Environmental Advisor	Environmental engineering/domain advisory; industrial advisory	advisordem@enviropius.in

Team names and credentials above are fictional test identities. Replace them with actual founders/team members before any real submission.

4. Problem Statement

Industrial environmental monitoring can involve multiple instruments, vendors, reports and data streams. Stakeholders may need a consolidated view of environmental conditions, abnormal events, historical trends and action priorities. EnviroPlus is designed as a software and sensing layer to consolidate authorized environmental data into a common operational interface.

5. Proposed Solution

- Unified ingestion of sensor, gateway and approved third-party/API data.
- Data validation, normalization and time-series storage.
- AI/analytics for anomaly detection and environmental risk indicators.
- Real-time alerts and escalation workflows.
- Role-based government and industry dashboards.
- Automated reporting and evidence trails.
- Sensor/data-health monitoring to identify missing or unreliable readings.

6. Technology Architecture

Layer	Proposed components
Sensing	Air, water, noise, emissions and wastewater instruments; industrial gateways
Connectivity	MQTT / HTTPS / secure APIs
Cloud ingestion	FastAPI/Node services, message queues, validation pipeline
Storage	PostgreSQL + time-series storage; object storage for reports
AI/analytics	Python ML, anomaly detection, trend analysis, risk scoring
Application	React/Next.js web dashboards; role-based access
Security	TLS, encryption at rest, RBAC, audit logs, backups

Layer	Proposed components
Outputs	Alerts, dashboards, reports, KPIs and pilot evidence

7. ₹60 Lakh Funding Proposal

Budget head	Amount	Purpose
IoT sensors / gateways	₹18,00,000	Prototype and pilot instrumentation
Product engineering	₹9,00,000	Web platform, backend, APIs
AI/ML + data engineering	₹8,00,000	Models, analytics, data pipelines
Cloud + cybersecurity	₹4,00,000	Hosting, observability, security
Testing / calibration	₹6,00,000	Validation and field testing
Pilot deployment	₹5,00,000	Installation, logistics, operations
Environmental experts	₹3,00,000	Domain validation and advisory
Stakeholder/commercial development	₹2,00,000	Pilot engagement and documentation
Contingency / working capital	₹5,00,000	Unexpected eligible project costs
TOTAL	₹60,00,000	

8. Illustrative 3-Year Financial Model

Metric	Year 1	Year 2	Year 3
Enterprise / industrial customers	5	20	50
Government/pilot deployments	2	6	12
Illustrative revenue	₹24L	₹90L	₹2.40Cr
Estimated gross margin	45%	55%	60%
Primary revenue	Pilot + platform subscriptions	Subscriptions + deployment	Subscriptions + analytics + deployment

These are planning assumptions for the prototype and must be replaced by validated pricing, contracts, costs and actual financial statements when available.

9. Proposed 90-Day Maharashtra Pilot

Period	Activity	Evidence
Weeks 1–2	Site and parameter selection; baseline	Site plan + baseline report
Weeks 3–5	Sensor/gateway/cloud deployment	Deployment checklist
Weeks 6–8	Calibration/data quality validation	Validation report
Weeks 9–11	AI anomaly/risk testing	Model evaluation
Week 12	Impact and scale review	Pilot outcome report

10. Government / Pilot KPIs

KPI	Proposed measurement
Data availability	Percentage of expected readings received
Data quality	Percentage passing validation rules
Alert latency	Time from detected anomaly to alert
Anomaly precision	Validated against reviewed events
Dashboard adoption	Active authorized users / sessions

KPI	Proposed measurement
Reporting time	Reduction in manual report preparation time
Pilot coverage	Number of monitored parameters/sites
Environmental action support	Number of alerts/workflows reviewed by authorized personnel

11. Complete Funding Application Document Checklist

No.	Document	Format	Purpose
01	Certificate of Incorporation	PDF	Legal existence
02	Entity PAN	PDF	Company identity
03	DPIIT Recognition Certificate / application evidence	PDF	Startup recognition
04	Maharashtra startup ecosystem registration/profile	PDF/screenshot	Program registration
05	MOA	PDF	Corporate records
06	AOA	PDF	Corporate records
07	Founder KYC	PDF	Due diligence, if required
08	Founder CVs	PDF	Team credibility
09	Pitch Deck	PDF/PPTX	Funding presentation
10	Business Plan	PDF/DOCX	Detailed proposal
11	Technical Proposal	PDF/DOCX	Architecture and implementation
12	MVP / Proof of Concept	URL/video/PDF	Product evidence
13	Demo video	MP4/URL	Product demonstration
14	Use of Funds	XLSX/PDF	■60L budget
15	Financial Model	XLSX/PDF	Forecast
16	Bank proof	PDF	If requested
17	Cap Table	XLSX/PDF	Investment diligence
18	Vendor quotations	PDF	Budget substantiation
19	Pilot proposal	PDF	Government/industry pilot
20	Pilot LOI/MoU	PDF	Only if actually signed
21	Sensor datasheets	PDF	Technical diligence
22	Calibration certificates	PDF	Actual equipment validation
23	Testing/validation plan	PDF	Technical credibility
24	Data governance policy	PDF	Government readiness
25	Cybersecurity architecture	PDF	Security diligence
26	IP ownership/assignment	PDF	Legal diligence
27	Trademark/patent documents	PDF	Only if actually filed
28	Board resolution	PDF	If required
29	Founder declaration	PDF	Application declaration
30	Government cover letter	PDF	Submission
31	Annexure index	PDF	Final application

12. Government Funding Cover Letter — Template

To

The Appropriate Authority / Startup Program Evaluation Committee
Government of Maharashtra / Designated Startup Ecosystem Authority

Subject: Proposal for support/funding for EnviroPlus — AI and IoT based environmental monitoring and intelligence platform

Respected Sir/Madam,

EnviroPlus is an environmental technology venture proposing a unified IoT and AI platform for authorized monitoring of air, water, industrial emissions, noise and wastewater. The proposed system combines sensing/data integration, cloud infrastructure, analytics and role-based dashboards to support faster visibility and evidence-based environmental operations.

We propose a pilot-led development program and seek financial support of ₹60,00,000 for product engineering, sensing infrastructure, AI/ML, cloud and cybersecurity, testing/calibration and pilot deployment.

The attached proposal describes the technology architecture, implementation plan, proposed KPIs, budget and documentation framework. We would welcome the opportunity to demonstrate the platform and discuss a suitable pilot pathway.

Sincerely,

Aarav Mehta

Founder & CEO

EnviroPlus Technologies Private Limited

13. Founder Declaration — Template

I/We declare that the information supplied in the actual application will be complete and accurate to the best of our knowledge and that all government registrations, financial information, customer claims, technical certifications and supporting documents will be genuine and verifiable. Any test data used in this software demonstration is not intended to represent an actual government registration.

Name: _____

Designation: _____

Signature: _____

Date: _____

14. Illustrative Cap Table

Holder	Role	Illustrative ownership
Aarav Mehta	Founder & CEO	70%
Riya Sharma	Co-Founder & CTO	20%
Employee/Advisor pool	ESOP/Advisor pool	10%
Total		100%

Illustrative only; replace with actual shareholding records after incorporation.

15. Risk & Mitigation Matrix

Risk	Mitigation
Sensor accuracy / drift	Calibration, validation and data-quality rules

Risk	Mitigation
Connectivity outages	Local buffering, retry mechanisms and health alerts
False positives	Human review, threshold tuning and model validation
Cybersecurity	Encryption, RBAC, audit logs and secure deployment
Government adoption	Pilot-first approach, measurable KPIs and workflow integration
Hardware procurement	Multiple qualified vendors and standardized interfaces
Regulatory interpretation	Use platform as monitoring/decision-support; rely on competent authorities for regulatory decisions

16. Suggested Website Demo Workflow

Startup Registration → Document Upload → OCR Extraction → Field Validation → Cross-Document Match → Eligibility Engine → Funding Score → Recommended Program → Admin Review → Decision / Next Steps

Example result: EnviroPlus → profile completeness 92% → documentation completeness 84% → eligibility assessment 87/100 → recommended funding pathway: ■60 lakh request for pilot/product scale, subject to program eligibility and official verification.

17. File Naming Convention

- 01_EnviroPlus_Company_Profile.pdf
- 02_EnviroPlus_Founder_Profile.pdf
- 03_EnviroPlus_Pitch_Deck.pdf
- 04_EnviroPlus_Business_Plan.pdf
- 05_EnviroPlus_Technical_Proposal.pdf
- 06_EnviroPlus_60L_Funding_Proposal.pdf
- 07_EnviroPlus_Financial_Model.xlsx
- 08_EnviroPlus_Pilot_Proposal.pdf
- 09_EnviroPlus_IP_Legal_Documents.pdf
- 10_EnviroPlus_Compliance_Security.pdf
- 11_EnviroPlus_Document_Index.pdf

18. Production Readiness Checklist

Item	Before real submission
Legal entity	Actually incorporated
PAN/CIN	Obtained from official authority
DPIIT	Applied/recognized if eligible
Maharashtra registration	Completed where required
Website/email	Actually controlled by startup
Founders	Actual people with matching KYC
MVP	Working and demonstrable
Financials	Based on actual books/assumptions
Funding budget	Supported by real quotations where required
Pilot	Actual site/partner discussions
Claims	Evidence-backed
Government IDs	Officially verifiable
Documents	Signed and internally consistent

END OF ENVIROPLUS FUNDING PACK

Prepared as a startup-platform demonstration artifact. Test data is fictional; replace with verified records for production use.
